

## How to create a pull request in GitHub

Click on the **Fork** button in the top-right corner

Copy link in **HTTPS**

**Clone the repo:** `git clone https://github.com/<YourUserName>/<Repo>`

**Create a new branch by issuing the command:** `git checkout -b <new_branch>`

**Create a new remote for the upstream repo with the command:**

`git remote add upstream https://github.com/kedark3/demo` *(the original repo you created your fork from)*

`git add .`

`git commit -S -m "Changes to new_branch"`

`git push -u origin <new_branch>`

Once you push the changes to your repo, the Compare & pull request button will appear in GitHub

Open a pull request by clicking the Create pull request button
